A slowing rate does not mean a falling price level.

▼ EXPLANATORY · PRICE LEVEL VS INFLATION RATE

THE PRICE DIDN'T GO BACK DOWN.

A SLOWING RATE ≠ A LOWER PRICE

▼ **THE INSIGHT:** When the rate of price increase slows, prices don't reverse — they keep climbing at a slower pace. The level stays high.

FOOD ANATOMY · DASHBOARD P.02

IT DOESN'T STOP AT THE MARKET.

An economic shock can travel through several parts of the economy before it reaches your kitchen.

▾ TRANSMISSION CHAIN · FX → FUEL → TRANSPORT → FOOD

AVG. LAG ≈ 3 MONTHS

FX RATE	FUEL PRICE	TRANSPORT	FOOD PRICES
₦1,450/$	₦1,049/L	₦58/km	18.7%

▸ BASED ON FX VOLATILITY PATTERNS

External shocks don't reach consumers directly — they move through prices of inputs (fuel, transport) and ultimately food prices.

▾ TRANSPORT · 2025 vs 2024

+50.6%

▸ per-kilometer transport cost

FX · ₦/$	FUEL · ₦/L	TRANSPORT · ₦/KM	AVG · LAG
1,450	1,049	58	3 mo
Reference rate	Reference price	Cost per kilometer	Shock to consumer

IMPACT & SOLUTIONS · DASHBOARD P.05

SO WHAT ACTUALLY HAPPENED?

Inflation is not one number. It is a system of interconnected pressures.

▾ **THE ECOSYSTEM:** INFLATION ↔ FOOD ↔ FX ↔ FUEL ↔ TRANSPORT ↔ GEOGRAPHY ↔ PURCHASING POWER

SOURCE

FULL DASHBOARD · P.01 – P.05

INFLATION ISN'T JUST A NUMBER.

IT CHANGES WHAT YOUR MONEY CAN BUY.

I built this dashboard to explore **Nigeria's 2024—2025 inflation story** — from **food prices** and **regional disparities** to **FX**, **fuel**, **transport** and **purchasing power**.
